25X1A
ORIGIN

1. Harbor authorities in the Soviet zone of Germany have complained to the SMA that the present capacity of the harbor facilities does not permit the proper handling of the volume of shipments involved. The SMA, planning to enlarge the harbor installations, has requested the Central Administrations to submit exact figures about the volume of goods handled in the different harbors.

2. The following figures were submitted by the department for International Trade:

Stralsund, monthly tonnage	40,000
Wismar " "	100,000
Rostock " "	80,000
Anklam " "	10,000
Wolgast " "	8,000
Greifswald " "	15,000

3. The main inland-water ports are the following:

Koenigswusterhausen, monthly tonnage handled	160,000
Fuerstenberg/Cder " "	40,000
Riesa " "	70,000
Dresden " "	80,000

It is planned to enlarge the Fuerstenberg installations to a monthly capacity of 90,000 tons. Up to now, only half of the harbor facilities in Dresden have been utilized.

This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 50, U.S.C. 3 and 32 as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.
